Frontend Development
(React, Redux, TypeScript, JavaScript, React Native)
IT Incubator | 2022

JS / FRONT-END
(JavaScript, HTML, CSS)
RS School | 2021

HTML, CSS and JavaScript
Wezom Academy | 2021

ABOUT ME

Delighted with the frontend and the coding process. Front-end developer with **1.5+ years** of experience in creating SPAs using TypeScript + React / React Native + Redux Toolkit. I am also currently in the process of learning Node JS. Diligent, efficient and responsible.

MY PROJECTS AS FRONTEND DEVELOPER

(React Native / RTK / Redux / TypeScript / JavaScript / HTML / CSS)
2022 — current time

Perfetto
The application developed for the De'Longhi Ukraine company and designed to speed up the adaptation of new employees.

Connectify
A social network app. The user can create his own profile, upload his photo, post messages, communicate in chat and private messages with other users.

Your Task Guru
The purpose of the application is to help organize the user's goals and tasks. The app allows you to register to create and edit your own task lists.

Learning Cards
A module for the educational platform, designed to help users learn new information using flashcards. The user can add his own cards for learning or learn from the cards of other users.

Momentum
This application provides the user with a personal dashboard to help focus, stay organized and stay motivated to achieve goals.

KEY RESPONSIBILITIES

➢ Team development using **Git**.
➢ Create **custom hooks** and reusable components.
➢ Authorisation flow (registration, login, recover password).
➢ **Error handling**.
➢ Work with **local / session storage**.
➢ **Form** processing and validation.
➢ Creation of adaptive design using **grids / flex**
➢ Create private **routes** and **redirecting**.
➢ Working with the server using Axios. (CRUD operations and data processing with **RESTful**).
➢ Pagination, search, filter and sorting features. Image uploading.

➢ Refactoring to eliminate code duplication, bug fixing.
➢ Covering applications with tests using **Jest**.
➢ Creating reusable utility functions.
➢ Improving **performance** and **optimization** using useCallback, useMemo and React.memo
